

ChemClear stickers are designed to:

Provide easy recognition and segregation of chemicals in your chemical storage area while waiting for disposal.

Provide quick identification of the chemical group classification at the collection site.

If you are unable to identify the classification of your registration or need to make changes please contact us on **1800 008 182** and quote your reference number.

Regular Contact

ChemClear will contact you directly to advise when a collection has been scheduled in your state or region.

HOW TO APPLY STICKERS

The quantity of stickers enclosed corresponds with your recent registration of unwanted agvet chemicals.

Individual stickers are sent when registrations are made of a **singular chemical variety**.

Placard stickers are sent out when **registrations are made of multiples of the same chemical**. These chemicals can be safely stored together and therefore we recommend that you store them in an oversized container or on a pallet, shrink wrap or secured and place the placard sticker on the outside. This process will make it easier for storing the chemicals in readiness for transporting them to the collection site.

Step 1: SORT

Sort your products into **Group 1 and Group 2 categories**.

Group 1 chemicals are currently registered (for use), recently out of date (2 years), with labels intact, & displaying a **drumMUSTER** eligible logo on the label or container.

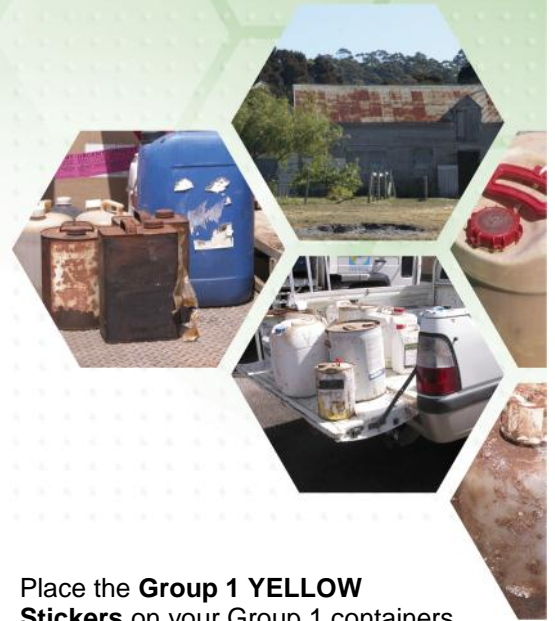

Group 2 chemicals are any unknown, unlabelled, out of date, de-registered chemical, or, non-participating member products (not displaying the **drumMUSTER** logo).

Step 2: PLACE

Please ensure that you place the correct classification sticker on your chemical container and make sure that the container label is not covered over.

Step 3: STORE

Store the chemicals safely until collection time.

Place the **Group 1 YELLOW Stickers** on your Group 1 containers

Place the **Group 2 RED Stickers** on your Group 2 containers.
